Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

SUBUNIT: Tightly associated with the cellulose synthase catal subunit (By similarity).

PATHWAY: Bacterial cellulose biosynthesis.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     SIMILARITY: BELONGS TO THE ACSB/BCSB FAMILY.
